Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

ANNOUNCEMENTS AND SPECIAL NOTICES

REVISIONS IN REFERENCE LISTING SHOWING CORRELATION BETWEEN SITC REVISED CLASSIFICATIONS AND SCHEDULE A COMMODITY NUMBERS

A review has shown that certain changes should be made in the correlation listing in the January 1963 issue of this report showing the Schedule A commodity numbers included within each 3-digit SITC code. These changes, which are shown below, were made effective with the March 1963 statistics. The statistics for January and February 1963 will be revised.

Also, all imports reported in January 1963 statistics under Schedule A No. 9703 692, SITC code 654, should be reclassified under Schedule A No. 9703 450.

Schedule A number	3-digit SITC code		Schedule A number	3-digit SITC code	
	Reads	S/Read		Reads	S/Read
0075 900	032	031	5420 010	276	273
0305 500[1]	581	655	6250 656	513	688
0344 100	581	655	6900 350	697	897
0344 500	581	655	6900 390	697	897
0346 900[2]	581	655	7100 215	729	724
1305 150	054	055	7100 270	729	891
1330 180	051	053	7800 500	718	719
1330 190	051	053	9470 000	894	951
3230 271[3]	654	899	9470 010	894	951
3230 275	654	895	9470 020	894	951
5393 000	663	895			

[1]In the January 1963 statistics, all imports under this Schedule A number were included in SITC code 611. All such imports in the February 1963 statistics were properly included in SITC code 655. In the March 1963 statistics, transactions for West Germany into Customs District 10 (New York) were included in SITC code 581 while all other transactions were properly included in SITC code 655. The statistics for January and March 1963 will be revised.

[2]In the January and February 1963 statistics all imports under this Schedule A number were included in SITC code 611. The statistics will be revised.

[3]This Schedule A number was established February 1, 1963 and first showed transactions in the March statistics. These transactions were divided between SITC codes 654 and 899 in the machine tabulations. In addition, the data for imports in the March publications under Schedule A number 3230 272 (an obsolete number) assigned to SITC code 654 should be transferred to Schedule A number 3230 271, SITC code 899. The statistics will be revised accordingly.

NEW SCHEDULE A COMMODITY NUMBERS TO BE USED FOR COMPILING IMPORT STATISTICS BEGINNING MAY 1963

Effective with the May 1963 statistics one Schedule A commodity number became obsolete (3651 990) and two new Schedule A commodity numbers were established as follows:

3-digit SITC code	Schedule A number	Commodity description	Unit of quantity
		Braids of wool (except hat braids), if loom woven and ornamented in weaving or made by hand, or on a braid, knitting, or lace machine; and articles (not wearing apparel) in part of braids (except hat braids and floor coverings):	
654	3651 850	Woven wool fabrics in part of braids (formerly part of 3651 990).....	Sq. yd.[v] Lb.....
654	3651 950	Other (formerly part of 3651 990).....	.....

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

The reports listed below are those which have been initiated since the last published list, covering statistics related to the data shown in this report. Special reports covering statistics related to other types of foreign trade data are listed in the current foreign trade reports covering such data. Reports previously contracted for are listed in earlier issues of this report, or in issues of the Foreign Trade Statistics Notes (published through the August 1960 issue and now discontinued.) Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual period covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is pro-rated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber.

Cost-sharing arrangements with the original subscribers are sometimes suggested in such cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after six months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" in the November 1962 issue of this report. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing special reports, should also be addressed to that Division.

SPECIAL MONTHLY REPORTS FOR 1962

FT 4006 United States Imports of Arsenic Trioxide (Schedule A Commodity Number 8201 000) for Consumption from Countries with Values under $10,000 by Customs District of Entry. *Price per year per subscriber $70.*

FT 9057 United States Imports of Merchandise for Consumption Identified as Niacin and Niacinamide (Included in Schedule A Commodity Number 8130 690), Commodity by Country of Origin. *Price per year per subscriber $150.*

FT 9060 United States Imports of Ammonium Persulfate, Potassium Persulfate, and Sodium Perborate (Included in Schedule A Commodity Numbers 8243 800, 8330 900, and 8350 600) for Consumption. Quarterly. Commodity totals. *Price per year per subscriber $700.*

FT 9061 United States Imports of Acrylic Staple Fiber, Not over 30 Inches Long and Acrylic Waste and Nylon Waste (Included under Schedule A Commodity Numbers 3810 090 and 3805 050) for Consumption by Country of Origin. *Price per year per subscriber $1,060.*

FT 9062 United States Imports of Merchandise Described as Acoustical Tiles and Ceiling Tiles, and Insulation Board (Included in Schedule A Commodity Numbers 4740 197 and 4740 198) for Consumption by Country of Origin. *Price per year per subscriber $1,760.*

FT 9063 United States Imports of Golf Clubs (Included in Schedule A Commodity Number 9439 990) for Consumption by Country of Origin. *Price per year per subscriber $1,060.*

FT 9064 United States Imports of Merchandise Identified as Vinyl Coated Materials and Unsupported Vinyl Sheeting (Included in Schedule A Commodity Numbers 0334 100 and 3971 020) for Consumption from United Kingdom, West Germany and Japan Only, Commodity by Country of Origin. Quarterly data. *Price per year per subscriber $280.*

REPORTS FOR SPECIFIED PERIODS

United States Imports of Merchandise for Consumption and General Imports of Merchandise from Japan by Schedule A Commodity. (Photocopies of Extracts from Machine Tabulation IA-236.) Calendar Year 1962. *Price per subscriber $40.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise from France by Commodity. (Photocopies of Extracts from Machine Tabulation IA-236.) Calendar Year 1962. *Price per subscriber $100.*

United States Imports of Welded Steel Pipe Not Less Than 3/8 Inch and Not Over 4 1/2 Inches in Diameter (Schedule A Commodity Numbers 6092 000 and 6092 060) for Consumption, Commodity by Country of Origin by Customs District of Entry. January-December 1958-1962. *Price per subscriber $100.*

United States Imports of Gray Cast Iron Threaded Pipe Fittings (Included in Schedule A Commodity Number 6113 200) for Consumption, (1) Regular of Steam Fittings Black, (2) Regular or Steam Fittings Galvanized, (3) Drainage Fittings Black, and (4) Drainage Fittings Galvanized, into the Customs Ports of Los Angeles, San Francisco, California and Seattle, Washington from Japan. July-December 1962. *Price per subscriber $350.*

United States Imports for Consumption and General Imports of Certain Earthenware Tiles (Schedule A Commodity Numbers 5380 530-5380 920), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IQ-245.) January-December 1961, January-September 1962 and January-December 1962. *Price per subscriber $90.*

United States Imports of Merchandise Identified as Vinyl Coated Materials and Unsupported Vinyl Sheeting (Included in Schedule A Commodity Numbers 0334 100, 3971 000 and 3971 020) for Consumption from United Kingdom, West Germany and Japan Only, Commodity by Country of Origin. July-December 1962. *Price per subscriber $305.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs Districts of San Diego, Los Angeles, San Francisco, Oregon, and Washington, Customs District by Schedule A Commodity by Country of Origin. Calendar Year 1961. *Price per subscriber contingent upon the number of subscribers.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs Districts of San Francisco, Oregon, Washington, Alaska and Hawaii, Customs District by Commodity by Country of Origin. (Photocopies of Extracts from Machine Tabulation IA-253.) Calendar Year 1962. *Price per subscriber $165.*

United States Imports for Consumption and General Imports of Merchandise into the Customs Districts of Sabine, Galveston, El Paso, San Diego, Arizona, Los Angeles, San Francisco, Oregon, Washington, Alaska, Hawaii, Montana and Idaho, Colorado and New Mexico; Customs District by Schedule A Commodity by Country of Origin. (Photocopies of Extracts from Machine Tabulation IA-253.) Calendar Year 1961. *Price per subscriber $250.*

United States Imports of Bananas, Green or Ripe (Schedule A Number 1301 000) for Consumption by Country of Origin and by Customs District of Entry. (Photocopy of An Extract from Tabulation IQ-245.) Calendar Year 1961. *Price per subscriber $15.00.*

United States Imports of Golf Clubs (Included in Schedule A Commodity Number 9439 990) for Consumption by Country of Origin. Calendar Year 1961. *Price per subscriber $950.*

United States Imports for Consumption Identified as Niacin and Niacinamide (Included in Schedule A Commodity Number 8130 690), Commodity by Country of Origin. Calendar Year 1961. *Price per subscriber $120.*

United States General Imports of Brandy, Vermouth and Still Wines (Schedule A Commodity Numbers 1711 500, 1732 120, 1732 620, and 1732 600) from France, Italy, Germany, Belgium, Holland, Luxembourg, Spain, Portugal, and Greece, Commodity by Country of Origin by Selected Price Interval, May and November 1961. *Price per subscriber $200.*

United States General Imports of Brandy, Vermouth and Still Wines (Schedule A Commodity Numbers 1711 500, 1732 120, 1732 620, and 1732 660) from France, Italy, Germany, Belgium, Holland, Luxembourg, Spain, Portugal, and Greece, Commodity by Country of Origin by Selected Price Intervals, May and November 1958. *Price per subscriber $200.*

United States Imports of Merchandise for Consumption into the Customs Districts of North Carolina, South Carolina, Georgia, Florida, Mobile, New Orleans, Sabine, Galveston, and Laredo from Canada, Sweden, Denmark, United Kingdom, Netherlands, Belgium and Luxembourg, France, West Germany, Austria, Switzerland, Spain, Italy, and Japan; Customs District of Entry by Country of Origin by Schedule A Commodity by Unit Control. Calendar Year 1961. *Price per subscriber $790. (This price covers ten copies.)*

United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs District of San Francisco, Oregon, Washington, Alaska and Hawaii; Customs District of Entry by Schedule A Commodity by Country of Origin by Unit Control. (Photocopies of Extracts from Machine Tabulations IA-253.) Calendar Year 1961. *Price per subscriber $150.*

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 5 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961- Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e.,SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics, in SITC group by country and in country by SITC group arrangements, are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-1 for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

U. S. Bureau of the Census United States Import Statistics, Report FT 110, June 1963. Washington, D.C., 20233. September 1963.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

UNITED STATES IMPORT AND EXPORT STATISTICS COMPILED IN TERMS OF THE STANDARD INTERNATIONAL TRADE CLASSIFICATION REVISED

The United Nations requested that beginning with calendar year 1962 statistics, the United States supply its trade data in terms of the full five digit items of the Standard International Trade Classification (SITC), Revised. A review of the SITC and Schedule A (import) and B (export) classification systems was made and it was found that the Schedules A and B classifications were convertible to about 700 and 600 SITC items, respectively. Accordingly, the United States has compiled its trade figures for calendar year 1962 in tabular form in terms of five digit SITC items where readily convertible and four digit SITC subgroups where it was not possible to convert to the fifth digit. The tabulations and the locations at which they are available for reference use are as follows:

A. Tabulations:

1. UN-206—United States Imports of Merchandise for Consumption, SITC Section by SITC Division by SITC Group by SITC Subgroup by Selected SITC Item by Schedule A Commodity Number. Calendar year data only.

2. UN-OECD-208—United States Imports of Merchandise for Consumption, SITC Section by SITC Division by SITC Group by SITC Subgroup by Selected SITC Item by Country of Origin. Calendar year 1962 and quarterly data thereafter.

3. UN-506—United States Exports of Domestic Merchandise, SITC Section by SITC Division by SITC Group by SITC Subgroup by Selected SITC Item by Schedule B Commodity Number. Calendar year data only.

4. UN-OECD-508—United States Exports of Domestic Merchandise, SITC Section by SITC Division by SITC Group by SITC Subgroup by Selected SITC Item by Country of Destination. Calendar year 1962 and quarterly data thereafter.

B. Reference locations:

1. Foreign Trade Division
Bureau of the Census
Room 2555
Federal Office Building 3
Washington, D.C. 20233
(Located at Suitland, Maryland)

2. United States Trade Statistics
International Trade Analysis Division
Bureau of International Commerce
Room 3040, Commerce Building
Washington, D.C. 20230

3. New York Office
Economic Operations Division
Bureau of the Census
Room 434, Customhouse
New York, New York 10004
(Located at Bowling Green)

The principal effort at convertibility of Schedules A and B to the SITC has been, and is, to have a high degree of convertibility to the 177 three digit SITC groups. Schedules A and B have been revised at times over the years to improve convertibility to the 177 groups. Furthermore, an attempt has been made to avoid revision of Schedules A and B which would decrease convertibility to the three digit SITC groups. Therefore, the degree of error in convertibility at the three digit level is believed to be small in terms of the dollar value of the trade involved. Convertibility to the four digit SITC subgroup, however, has been made only within the limits of the Schedules A and B detail, with the result that there have been a number of instances of "forcing" when a Schedule A or B commodity classification covering trade classifiable under two or more SITC subgroups has been assigned to an individual SITC subgroup on the basis of estimated "principal value component" criteria. The relative error in the conversion to the four digit SITC subgroups is therefore greater than that resulting from the conversion to the three digit SITC group level.

IMPORT COMMODITY STATISTICS TO BE IN TERMS OF TARIFF SCHEDULES OF THE UNITED STATES EFFECTIVE SEPTEMBER 1963

The Tariff Schedules of the United States Annotated (TSUSA), an official publication of the United States Tariff Commission embracing the legal text of the Tariff Schedules of the United States together with statistical annotation, became effective on August 31, 1963. Beginning on that date, TSUSA replaced United States Import Duties Annotated as the basic statistical reporting manual used in preparing import entry and withdrawal forms for merchandise imported into the United States.

Effective with statistics for September 1963, this document will also replace Schedule A, Statistical Classification of Commodities Imported into the United States, as the basic reference manual for use in interpreting the published data since all import commodity statistics for September and subsequent months are to be tabulated and published in terms of TSUSA.

Presentation of data in the September 1963 and subsequent issues of Report FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin, will be in terms of the TSUSA within each of the 177 three-digit commodity groups of the United Nations Standard International Trade Classification (SITC). There will be no change, however, in the presentation of data in Report FT 120, United States Imports of Merchandise for Comsumption, Country of Origin by SITC Commodity Group.

It is planned that tables will be issued concurrently with the September statistics which will show the TSUSA classifications within each SITC group, and for each TSUSA classification the SITC group in which it is included. Plans for other correlation tables will be announced in subsequent issues of this report.

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

The reports listed below are those which have been initiated since the last published list, covering statistics related to the data shown in this report. Special reports covering statistics related to other types of foreign trade data are listed in the current foreign trade reports covering such data. Reports previously contracted for are listed in earlier issues of this report, or in issues of the Foreign Trade Statistics Notes (published through the August 1960 issue and now discontinued.) Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual period covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is pro-rated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber.

Cost-sharing arrangements with the original subscribers are sometimes suggested in such cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after six months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" in the November 1962 issue of this report. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing special reports, should also be addressed to that Division.

NOTE: The price per subscriber for special import reports for 1963, as listed below and in the May 1963 issue of Report No. FT 110, covers the cost for preparing the reports in terms of the commodity classifications provided in Schedule A, Statistical Classification of Commodities Imported into the United States. Schedule A commodity classifications are based on the commodity classifications established by the Tariff Act of 1930, as amended. When the Tariff Classification Act of 1962 becomes effective, the commodity classifications in the import special reports will be in terms of the Tariff Schedules of the United States Annotated (TSUSA).

In so far as it is possible, the commodity coverage of the statistics presented in the special reports, whether identified in terms of Schedule A classification or TSUSA classification, will be maintained. However, the change in classification structure from Schedule A to TSUSA may affect the reports and/or their cost as follows:

1. *Decrease or increase the cost for preparing a special report. In this case the recipient(s) will be notified of any necessary adjustment in cost.*

2. *Make available separately in the regularly released statistics the data presently available only in a special report. In this case the special report will no longer be necessary and the subscriber(s) will be refunded the unexpended balance of the original subscription price.*

3. *Consolidate commodity information to such an extent that the desired detail is no longer available in separate classifications or identifiable on the import entries (the basic source of the statistics). In this case the subscriber(s) will be notified of the change and appropriate adjustment in the report and/or cost may be made where possible or where not possible the special report would be discontinued and the subscriber(s) would be refunded the unexpended portion of the original subscription price.*

SPECIAL MONTHLY REPORTS FOR 1963

FT 7059 United States Imports of Lactic Acids and Anhydrides (Schedule A Commodity Numbers 8220 210, 8220 230 and 8220 250) for Consumption, Commodity by Country of Origin. *Price per year per subscriber $112.*

FT 8092 United States Imports for Consumption and General Imports of Blasting Caps (Schedule A Commodity Number 8621 200), SITC Section by SITC Group by Schedule A Commodity Number by Unit Control by Country of Origin by Customs District by Rate Provision by Type. (Photocopies of Extracts from Machine Tabulation IM-145). *Price per year per subscriber $100.*

FT 8093 United States Imports of Watches, Watch Movements and Parts (USIDA Numbers 0367 0500 - 0367 9020) for Consumption into the Virgin Islands from Foreign Countries, USIDA Commodity by Unit Control by Country of Origin by Customs District by Type. (Photocopies of Extracts from Machine Tabulation IM-141-V). *Price per year per subscriber $160.*

FT 8094 General Imports of Watches, Watch Movements and Parts (Schedule A Number 9560 000 - 9570 960) into the United States from the Virgin Islands, Schedule A Commodity by Customs District by Type. (Photocopies of Sections of Report IM-161.) *Price per year per subscriber $100.*

REPORTS FOR SPECIFIED PERIODS

United States Imports of Merchandise for Consumption into the Customs Districts of North Carolina, South Carolina, Georgia, Florida, Mobile, New Orleans, Sabine, Galveston, Laredo and Tennessee from Canada, Brazil, Sweden, Denmark, United Kingdom, Netherlands, Belgium and Luxembourg, France, West Germany, Austria, Switzerland, Spain, Italy, and Japan; Customs District of Entry by Country of Origin by Schedule A Commodity by Unit Control. Calendar year 1962. *Price per subscriber $1,240. (This price covers eleven copies.)*

United States General Imports of Brandy and Wines in Containers Holding Each One Gallon or Less (Schedule A Commodity Numbers 1711 300, 1732 110, 1732 610, 1732 630, 1732 700 and 1732 710), Commodity by Country of Origin by Selected Price Intervals. May and November 1962. *Price per subscriber $680.*

United States General Imports of Brandy and Wines in Bulk (Schedule A Commodity Numbers 1711 500, 1731 100, 1731 200, 1732 120, 1732 200, 1732 620, 1732 740 and 1732 750), Commodity by Country of Origin by Selected Price Intervals. May and November 1962. *Price per subscriber $520.*

United States Imports of Watches, Watch Movements and Parts (USIDA Numbers 0367 0500-0367 9020) for Consumption Into the Virgin Islands from Foreign Countries, USIDA Commodity by Unit Control by Country of Origin by Customs District by Type. (Photocopies of Extracts from Machine Tabulation IM-141-V.) January-December 1962. *Price per subscriber $160.*

United States General Imports of Watches, Watch Movements and Parts (Schedule A Commodity Numbers 9560 000-9570 960) into the United States from the Virgin Islands, Schedule A Commodity by Customs District by Type. (Photocopies of Sections of Report IM-161.) January-December 1962. *Price per subscriber $100.*

United States Imports for Consumption and General Imports of Certain Glass (Schedule A Commodity Numbers 5200 300-5220 225), Commodity by Unit Control by Country of Origin by Customs District by Rate Provision by Type. (Photocopies of Extracts from Machine Tabulation IQ-245.) Calendar year 1962. *Price per subscriber $100.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise from Japan, Customs District of Importation by Schedule A Commodity. (Photocopies of Extracts from Machine Tabulation IA-253.) Calendar year 1962. *Price per subscriber $1,100.*

United States Imports of Aluminum Fluoride (Included in Schedule A Commodity Number 8380 170) for Consumption by Country of Origin and Domestic Port of Unlading. Calendar years 1959-1961. *Price per subscriber $455.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs District of Los Angeles by Schedule A Commodity. (Photocopies of Extracts from Machine Tabulation IA-253.) Calendar year 1962. *Price per subscriber $130.*

United States Imports for Consumption and General Imports of Bicycles and Parts (Schedule A Commodity Numbers 7940 010-7940 090), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IQ-245.) Calendar year 1962. *Price per subscriber $140.*

IMPORTS OF "LEAD BULLION OR BASE BULLION" (SCHEDULE A COMMODITY NUMBER 6504 000) IN ERROR - 1962 ANNUAL STATISTICS

As a result of a processing error, the statistics shown in the 1962 Annual Report Number FT 110 for imports of "Lead Bullion or Base Bullion" (Schedule A number 6504 000) were incorrect with respect to gross pounds and content pounds of lead. The corrections in the 1962 statistics are shown below:

Schedule A Commodity Number 6504 000 - GLB.

Country	Reads		Should read	
	Quantity	Value	Quantity	Value

Total.....	23,917	...	4,165,055	709,928

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 6 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961- Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e.,SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics, in SITC group by country and in country by SITC group arrangements, are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-I for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]

Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

ANNOUNCEMENTS AND SPECIAL NOTICES

PUBLICATION OF UNITED STATES IMPORT STATISTICS IN TERMS OF TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED

It was announced in the June 1963 issue of Report FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin, and FT 120, United States Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group, that all import commodity statistics for September 1963 and subsequent months are to be tabulated and published in terms of the Tariff Schedules of the United States Annotated (TSUSA). Presentation of data in the September 1963 and subsequent issues of Report FT 110 will be in terms of the TSUSA within each of the 177 three-digit commodity groups of the United Nations Standard International Trade Classification (SITC). There will be no change, however, in the presentation of data in Report FT 120. In addition, the directly affected tabulations (such as IM 145, IM 153, etc.) and releases or publications will be modified accordingly. Along with the publication of the September 1963 data, listings which show the SITC group code assigned to each TSUSA number and the TSUSA classifications included within each SITC group will be provided.

A special publication presenting 1961 annual data in Tariff Schedules of the United States (TSUS) by country of origin and country of origin by TSUS arrangement will be released at approximately the same time as the September 1963 statistics are released. TSUS classification numbers are the 5-digit Tariff items which appear in the Tariff Classification Act of 1962. The TSUSA classification numbers are 7-digit numbers which represent a statistical subdivision of the tariff item (indicated by a 2-digit statistical suffix). An index, based on a conversion supplied by the Tariff Commission, in TSUS by Schedule A, Statistical Classification of Commodities Imported into the United States, commodity numbers in effect during 1961 and in Schedule A by TSUS number will be prepared for release as a supplement to this publication of 1961 data. As conversions between TSUS and Schedule A commodity numbers in effect during 1962 and 1963 are developed by the Tariff Commission, special publications (similar to the 1961 publication) will be prepared for those years. The publication of these data are intended to provide a basis for making comparisons with statistics compiled on a TSUSA basis effective with September 1963. As indicated in the June announcement, TSUSA will replace Schedule A as the basic reference manual for use in interpreting import data effective with the September 1963 statistics.

NEW SCHEDULE A COMMODITY NUMBERS BEING USED FOR COMPILING IMPORT STATISTICS BEGINNING JULY 1963

Effective with the July 1963 statistics certain Schedule A commodity numbers became obsolete and new or revised classifications were established. The new classifications are as follows:

3-digit SITC code	Schedule A number	Commodity description	Unit of quantity
599	0944 000	Mixtures of which casein or lactarene is the component material of chief value, n.s.p.f. (formerly part of 0943 000).....	Lb.
599	0945 000	Casein or lactarene (formerly part of 0943 000).....	Lb.
		Miscellaneous articles of cotton, or of cotton and India rubber, n.s.p.f., and miscellaneous articles of cotton or other vegetable fiber:	
656	3230 705	Quilt covers (from 3230 712[10/62]).....	Lb.[V] No.

Official revision in Schedule A will be issued in Public Bulletin A-5.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985 Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 5 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961- Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e.,SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics, in SITC group by country and in country by SITC group arrangements, are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-I for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]
